PrimoPDF printer 3.0

<https://vetusware.com/download/PrimoPDF%20printer%203.0/?id=17809>

Create printable pdf files on any Windows 98 program using the program as a virtual printer. 1) The \*.pdf files can be exported to a modern Host system with a printer, if using VirtualBox/VMware. Or 2) If using genuine vintage hardware, the pdf's created can be transferred to modern systems for printing. Instructions for printing from virtual Win98 systems in VirtualBox/VMware included in the text file in the downloadable \*.zip file.

WordPerfect X3

<https://vetusware.com/download/WordPerfect%20X3/?id=17810>

Installation CD \*.iso image and serial number both found in the \*.zip file. Tried and tested on a Virtual Windows 98SE system running on a Windows 10 Host. Should probably also work on Windows XP & real vintage hardware with at least Windows 98 SE.
