MS Office 4.2 v4.2

<https://vetusware.com/download/MS%20Office%204.2%20v4.2/?id=17857>

CD \*.iso image found in the downloadable \*.zip file. Tried and tested on a virtual Windows 3.11 system running on VirtualBox under a Windows 10 Host. Should probably run on genuine vintage windows 3.x systems as well. Serial number was automatically entered and so didn't have to manually enter it during installation.
