WFW 3.11 network printing fix 3.11

<https://vetusware.com/download/WFW%203.11%20network%20printing%20fix%203.11/?id=18033>

When you print to a Workgroup Add-On for MS-DOS print server across the network from a Windows-based application, an extra (or separator) page is ejected at the end of each job. When you print across the network from an MS-DOS-based application, or locally from either an MS-DOS-based or a Windows-based application, the extra page is not ejected. The WG1049 disk included with this Application Note contains updated NET.EXE, NET.MSG, and NETH.MSG files. Using these files with version 3.11 of Workgroup Add-On for MS-DOS corrects the problem noted above.

Windows 3.1 256 colors display driver 3.1
