Freehand 5.0a

<https://vetusware.com/download/Freehand%205.0a/?id=18038>

FreeHand 5.0a Released in 1995 by Macromedia For Windows 3.1 with Win32s, 95, and NT
Freehand is a vector based drawing program used to create illustrations. It is similar to CorelDraw and Adobe Illustrator. This version was released by Macromedia, after Aldus was bought out. This version is a 32-bit Win32s application that can run under Windows 3.1 with Win32s, 95, or NT. Note: The setup program crashes under some emulators. This appears to be related to the detection of Win32s. Disks need redump from original media. Nicked from:
