Kodak Photo CD Player for Windows 3.0 and 3.1 2.0.3

This is the last known version of Kodak's Photo CD Player for Microsoft Windows. The application date is June 1994 with a file date of November 1996. It plays all versions of Photo CD discs including Portfolio CDs with sound. This works with all 16bit and 32bit versions of Windows from Windows 3.0 (you read that right!) up to and including Windows XP. I haven't tried it on later OS but if they are 32bit they should work.
