Microsoft Money is a home oriented financial management tool. It was designed specifically for Microsoft Windows, and was touted as being easier to use. At its release it competed against products such as Quicken. Microsoft Money was discontinued in 2009. On June 17, 2010, Microsoft announced the release of Money Plus Sunset, a downloadable version of Money Plus Deluxe and Money Plus Home & Business. Money Plus Sunset does not require online activation or the installation of any previous version of Money on the user's computer, and it should not be installed over the original 2008 version, if online services are still required.
