portable remote control 4 NT getscreen.exe 1.0

<https://vetusware.com/download/portable%20remote%20control%204%20NT%20getscreen.exe%201.0/?id=18376>

Basic command line remote control tool I found on the former Compaq ftp site in the early 2000s.

It is portable and works only on the server or workstation professional versions of NT-based systems up to Windows XP. Not tested on server 2003, but probably works. I use it on these old systems when no other remote control system is available... made a short documentation file
