Return Fire
http://vetusware.com/download/Return%20Fire/?id=12619
Return Fire is a PC port of the 3DO game of the same title. Defend your underground bunker and attack the enemy's bunker using tanks, mobile missile platforms and attack helicopters in this free-roaming top-down 3D shoot-em up!   Alternatively, go against another player in a capture-the-flag match!   WARNING: Requires 265-color video mode.

Spryjinks Beta 0.92
http://vetusware.com/download/Spryjinks%20Beta%200.92/?id=12618
The game is very simple in concept: Does anyone out there remember an old atari 2600 game called 'quick step'? Probably not, at least I haven't met anyone other than my brother who does. Spryjinx is the result of what started as an attempt to bring back what i consider a classic, then i got 'creative' and made it my own by adding a lot of my ideas to it.   It also has some similarities to 'q-bert' which you may or may not remember. This game is just about as simple, but has all the fun of head-to-head play.   Supports two-player and AI opponents.
