Borland Resource Workshop 4.5

<http://vetusware.com/download/Borland%20Resource%20Workshop%204.5/?id=13305>

Borland Resource Workshop v4.5 May, 1995 Windows 3.11 95, 98, 2000, XP Use to edit/change resources inside 16 bit (NE) EXE and DLL files, such as cursors, bitmaps: alter or even change the language in Dialog boxes. This is a full, standalone installer. It will run on almost ALL Windows versions from Windows 3.11 through Windows XP. It will NOT run on 64 bit Vista or 64 bit Windows 7. There are several options to explore when installing: 1. Unpack to a directory on your boot drive, such as C:\Source. (you may place all files from both directories into one - the Installer will find them) 2. Copy the contents of each directory to floppy disk, and run install from Disk1. That's all, cheers, AppleSeed in 2016

Symantec Resource Studio 1.0

<http://vetusware.com/download/Symantec%20Resource%20Studio%201.0/?id=13306>

Symantec Resource Studio v1.0 16-32 bit - October 1995 Windows 3.1/Win95 Use to edit/change resources inside 16/32 bit EXE and DLL files, such as cursors, bitmaps: alter or even change the language in Dialog boxes. This is taken from Symantec C++ 7.0 (I think). It's an unpack and run archive - there was not a separate installer. Although not as well known as Borland's Resource Workshop, this one does work well and offers OLE. After all, Symantec had purchased Zortech right about when it was at version 6.1, and Zortech was the DeLorean of its day - back when good compilers were hard (and expensive) to come by. Just unpack to a directory off the root of your hard drive such as C:\RES_EDIT and run. Cheers, AppleSeed in 2016

Terminator 2 The Screen Saver

<http://vetusware.com/download/Terminator%202%20The%20Screen%20Saver/?id=13307>

T2: The Screen Saver features vibrant animations and simulations based on Terminator 2: Judgment Day. Left unattended, your screen will activate with menacing endoskeletons, cyberindustrial machinery, liquid metal morphs, official Cyberdyne Systems graphics and of course, Arnold Schwarzenegger's infamous leather-clad terminator!
