Borland Delphi 5 - Standard 5.0 Standard (DE)

<http://vetusware.com/download/Borland%20Delphi%205%20-%20Standard%205.0%20Standard%20DE/?id=13301>

This is the German version of Borland Delphi 5 - Standard. Install CD is compressed as 7Zip file.

Borland Resource Workshop 5.02

<http://vetusware.com/download/Borland%20Resource%20Workshop%205.02/?id=13304>

Borland Resource Workshop v5.02 - March, 1997 Use to edit/change resources inside 32 bit (PE) EXE and DLL files, such as cursors, bitmaps: alter or even change the language in Dialog boxes. This is taken from Borland C++ v5.02. It's an unpack and run archive - there was not a separate installer. BCC v5.02 was released in March 1997, so this was expected to run on Win95 and up. Tested as working even on Windows 7, SP1, x64. NOTE: There have been other packages of BCC Workshop 5.02, but they all were missing the same DLLs. This one has everything, needs no special command line parameters or config files. Just double-click on "bcw.exe" after unpacking and get to work! Cheers, AppleSeed in 2016

Turbo C++ 3.1 3.1 (DE)

<http://vetusware.com/download/Turbo%20C%2B%2B%203.1%203.1%20DE/?id=13302>

This is Borland C++ 3.1 for Windows. It was then distributed by TopWare. German Manuals as PDFs included.
