Windows 3.1 PE Builder 1.0

<http://vetusware.com/download/Windows%203.1%20PE%20Builder%201.0/?id=13377>

Here is my windows 3.1 Pre-installed environment builder, you can make a bootable cd or floppy disk with windows 3.1, there is 2 versions one is the full version and the other one is the mini version. Just extract the 7-zip file and open config32.bat file there is a youtube video coming soon theres a link in the 7-zip file that will be available shortly

Windows 3.1 runs off of a floppy disk 3.1

<http://vetusware.com/download/Windows%203.1%20runs%20off%20of%20a%20floppy%20disk%203.1/?id=13375>

This is my bootable windows 3.1 that runs off a single floppy disk. Its based off of Windows 9x/Me setup program where microsoft kept a secret miniaturized version of windows 3.1, they called it Mini-Windows as you would see in the WIN.INI file stored in the MINI.CAB file. It cant run MS-DOS programs while running windows, but its amazing on its file size. Its my special version of Windows PE. The download includes the floppy version and the CD-ROM Version.
