Popcorn 1.0 (FR)
http://vetusware.com/download/Popcorn%201.0%20FR/?id=13570
Popcorn is a Breakout-style game. The goal is to destroy bricks with a ball that bounces off a
paddle the player controls. The layout of the bricks is different in each level. Some bricks are
indestructible, forming areas that can "trap" your ball or force it to bounce off in a sharp
movement, making it more difficult to hit it with the paddle. Other bricks take several hits to break.
There are also enemies which float around the bricks and will deliberately redirect the ball. The
player has a certain amount of lives; each time the player lets the ball fall off the screen, a life is
lost.   There is a variety of upgrades (letters that fall down when the player breaks certain bricks)
to use in this game.
