UpLoadProcessor v2.26 OS/2 2.26

<http://vetusware.com/download/UpLoadProcessor%20v2.26%20OS2%202.26/?id=13603>

UpLoadProcessor/2 for OS/2 v2.26. Now the premier upload processing system is available in a multi-threaded 32-bit native OS/2 version! \*\*\* NOTE: This archive is not a complete package; it contains the OS/2 files only. The general release archive ULP\_226.ZIP must also be downloaded for the complete package!!! To install, simply copy these files to your DOS ULP 2.x subdirectory.
