Lucid 3D, created by PCSG, Inc. and sold by DacEasy, Inc., is a spreadsheet program for
MS-DOS. The feature that sets it apart from others is that it is memory-resident, so you can bring
it up on top of other DOS programs and exchange data with them. Unlike simple TSRs, however,
Ludid 3D is a full featured spreadsheet. It features linking, macros, windowing, intelligent
recalculation, background recalculation, and user-definable functions. This software is not copy
protected.   Includes one 360K 5.25" floppy disk image.
