Microsoft Word 2.00 for DOS

<http://vetusware.com/download/Microsoft%20Word%202.00%20for%20DOS/?id=11869>

Word 2.0 for DOS adds support for IBM EGA, support for additional printers, enhanced for DOS 2.0, and includes Microsoft Spell 2.0. It was criticized for having slower file access than its competitors. Requires: 256KB RAM, DOS 2.0 or later, two double-sided floppy disk drives or a hard drive. Important: This software contains copy protection. No unprotect is provided or known to exist. When installed to a hard drive, it does not check for the floppy. Therefore, it may be easier to copy the files in HDFS to a C:\ on an emulated image or hard drive. This archive includes images in CopyII PC+Snatchit and Transcopy format.

PC Paint 3.1

<http://vetusware.com/download/PC%20Paint%203.1/?id=11870>

PC Paint 3.1 is a state-of-the-art paint program that lets you use a mouse to create professional-quality graphic images on your computer screen. It is significantly improved over previous versions of PC Paint and PC Paint Plus. It contains the following major features:
Works with modern video adapters CGA, EGA, Hercules, VGA, AT&T 6300 Uses 800x600 mode on Cirrus, Paradise, Tseng Labs chipsets 36 types of flood and fill with dither, edge seek, color spread Fills area larger than screen with text (floating text regions) Allows adjustment of font, size, alignment, spacing, wrapping Provides marquee for editing before fixing image on the screen Reads and writes files in PIC, BSAVE, GIF, and PCX formats Writes files in IMG (GEM/Ventura) format Makes best use of DOS memory to hold images

Road Rash

<http://vetusware.com/download/Road%20Rash/?id=11868>

A great motorbike game

Tutorial Batch File Utilities.

<http://vetusware.com/download/Tutorial%20Batch%20File%20Utilities./?id=11873>

batch file utilities .plus dos 2 .I have a copy of dos 2 original so I copied on to a 1.44 floppy so this utility could work .copy the file of .tutorial batch file utilities on to a directory in dos .I made one called batch .highlight this file .copy dos 2 onto a 1 44 floppy .the batch file utility will then ask you to insert the dos 2 then it will start .actually all you really need is one file from dos 2 but just insert the floppy and it will find the file that it needs to start the program when the file is highlighted type runme at the prompt .this was used in an xt but will run in a later computer with at least dos 5
