#### CSDIFF 1.1

<http://vetusware.com/download/CSDIFF%201.1/?id=14397>

ComponentSoftware Diff (CSDiff) is a powerful text file difference analysis tool for Windows 95/NT. Use it to analyze what have changed between two revisions of the same file. CSDiff is usually used to analyze program source files and HTML documents.

#### Disktective 2.2

<http://vetusware.com/download/Disktective%202.2/?id=14396>

Disktective is a freeware program, can be used without any limitations and can be distributed freely. However no-one other than the programmer of this product can claim commercial/legal ownership. Only the author of this program is allowed to change or adapt it. If you want to sell it, you must contact the programmer.

#### Klik-A-Dir

<http://vetusware.com/download/Klik-A-Dir/?id=14395>

Klik-A-Dir is a program that offers a quick and easy alternative for exploring and maintaining your system. When using Klik-A-Dir you can browse your harddisk in a way that closely resembles the workings of the Start Menu. Just one click to start and one click when you reach the desired folder. Klik-A-Dir is always showing the actual harddisk-structure. No need for scanning your harddisk after changes have taken place. Klik-A-Dir does not create any datafiles.

#### More Properties
