Volkswriter 3 (r1.0)

http://vetusware.com/download/Volkswriter%20%20_r1.0_/?id=14673

Volkswriter, from Lifetree Software Inc, was an early easy to use word processor for the IBM PC. Development of Volkswriter was inspired by the horridness of EasyWriter, and for a brief time it was possibly the only usable word processor for the IBM PC before an IBM version of WordStar was released. It was first released in 1982, and first version was reportedly copy protected. The "Deluxe" version will work with larger documents and has more features. Volkswriter 3 adds visible line spacing, automatic paragraph formatting, math functions, spellchecker, mail merge and Topview compatibility. Archive includes PDF manual and four 360k 5.25" floppy disk images.
