Borland Turbo Pascal 1.00A for Macintosh 1.00A

<http://vetusware.com/download/Borland%20Turbo%20Pascal%201.00A%20for%20Macintosh%201.00A/?id=14945>

Turbo Pascal for Macintosh was a short lived port of Borland's Pascal product to the Apple Macintosh. It featured a more advanced compiler than the DOS version at the time.

Borland Turbo Pascal 1.1 for Macintosh 1.1

<http://vetusware.com/download/Borland%20Turbo%20Pascal%201.1%20for%20Macintosh%201.1/?id=14946>

Turbo Pascal for Macintosh was a short lived port of Borland's Pascal product to the Apple Macintosh. It featured a more advanced compiler than the DOS version at the time. Version 1.1, added support for the Macintosh II.

HyperNet 1.00 for Macintosh

<http://vetusware.com/download/HyperNet%201.00%20for%20Macintosh/?id=14947>

Hypernet is a multi-user file sharing tool for early Macintosh computers that lets one or more Macintosh act as a file server connecting to multiple clients. Version 1 can only be used with General Computer's Hyperdrive internal hard drives. Version 2 does not have that restriction. Hypernet includes an update to the Hyperdrive system software.

TeleGrafix RIPaint v1.52.00

<http://vetusware.com/download/TeleGrafix%20RIPaint%20v1.52.00/?id=14948>

RIPaint is a tool for creating Remote Imaging Protocol vector graphics to be displayed over BBS/telnet using terminal emulators such as RIPTerm.

TeleGrafix RIPaint v1.53.00

<http://vetusware.com/download/TeleGrafix%20RIPaint%20v1.53.00/?id=14949>

RIPaint is a tool for creating Remote Imaging Protocol vector graphics to be displayed over BBS/telnet using terminal emulators such as RIPTerm.
