CROSS WORD FINDER is a word-search program designed especially to make writing crossword puzzles easier and faster. Its primary purpose is to generate a list of words that match a specified length and letter pattern (in case, for example, you need a five-letter word that starts with "a" and has "j" as the third letter). A source list of over 200,000 words is provided with the program, but you may also create your own source list (see ALTERNATE FILES). CROSS WORD FINDER can also be used for solving crossword puzzles, but we do not provide definitions--that's up to you. When creating crossword puzzles with CROSS WORD FINDER, you will probably need an unabridged dictionary to write clues for unfamiliar words.
