NeoBook Professional 2.0 2.0

<http://vetusware.com/download/NeoBook%20Professional%202.0%202.0/?id=15655>

NeoBook and NeoBook Professional for DOS, like their more advanced Windows counterpart above, are multimedia authoring systems which allow you to easily create and publish your own powerful electronic publications. Even inexperienced non-programmers can quickly create interactive, multimedia software applications such as: electronic books, presentations, disk-based brochures or greeting cards, educational and training materials, catalogs, electronic magazines, sales tracts and many other types of applications. Completed projects can be compiled into stand-alone executable DOS EXE files for easy royalty-free distribution. The professional edition adds support for FLC/FLI animation files, VOC sound files (with 100% Sound Blaster compatible sound cards) and the ability to launch DOS applications within a publication. NeoBook and its compiled programs may be run under DOS, or as DOS applications under Windows 3.x, 95 and NT or OS/2, for widest possible distribution. Winner PC Magazine-Ziff Davis and SIA Foundation "Best Presentation Multimedia Application" awards.
