IBM DisplayWrite 3 r1.00

<http://vetusware.com/download/IBM%20DisplayWrite%203%20r1.00/?id=15693>

DisplayWrite is a word processor that is based on the IBM Displaywriter dedicated word processing system. DisplayWrite 3 adds support for Macros, Built in help, and an improved spell checker. DisplayWrite 3 is the last to have the same user interface as the hardware based DisplayWriter system. DisplayWrite 4 changes to a pop-up menu based interface.
