Piranha

<http://vetusware.com/download/Piranha/?id=15849>

Piranha is your run-of-the-mill Asteroids clone, but features a vast range of weapons and enemies across 100 levels of gameplay. With improved graphics and (well, some of it) music by Eric Streidell (Zodiak / Cascada) and Prism / EMF, this is one of the more recent additions to the huge list of Asteroids clone.
