IBM Business Adviser Inventory Control Edition 1.0

<http://vetusware.com/download/IBM%20Business%20Adviser%20Inventory%20Control%20Edition%201.0/?id=15871>

Inventory Control Edition is one of a series of highly integrated modules or "editions" for IBM's Business Adviser system. Business Adviser is a high-end modular accounting and business management program targeted at large businesses. It was written by BPI for IBM, but is not simply a rebranded BPI product. Inventory Control keeps track of inventory in warehouses supporting different costing methods and generates purchase orders and reports. This is an add-on to IBM Business Adviser General Accounting Edition, which must be installed prior to installing this program.
