#### MathType 1.0

<http://vetusware.com/download/MathType%201.0/?id=15933>

MathType is a tool for creating printable mathematical formulas. It includes a set of special fonts with mathematical symbols, and the application helps compose them. The results can then be copied in to word processors, or exported to graphics files. A subset of this application became Microsoft Office's Equation Editor. This is a Microsoft Windows 2 application, it is compatible with Windows 3.0. This archive includes two 5.25" 1.2mb floppy disk images.

#### MathType 1.1a

<http://vetusware.com/download/MathType%201.1a/?id=15934>

MathType is a tool for creating printable mathematical formulas. It includes a set of special fonts with mathematical symbols, and the application helps compose them. The results can then be copied in to word processors, or exported to graphics files. A subset of this application became Microsoft Office's Equation Editor. Version 1.1a is only for Windows 3.x. It fixes many issues and adds support for Adobe Type Manager. This archive includes one 5.25" 1.2mb floppy disk image. This is an upgrade disk, but it installs without any previous version.
