### Caesar 3 High Quality MP3s

<http://vetusware.com/download/Caesar%203%20High%20Quality%20MP3s/?id=16270>

MP3 Support Bianca van Schaik edited this page 15 days ago · 1 revision Julius supports the playback of MP3 files instead of the original, low-quality wav files. If you have the high-quality MP3 files that were once available from the Sierra Website, you can play them instead of the original files. Alternatively, you can play any MP3 file you like instead of the original music. The original five city background MP3 files can be downloaded here. Requirements In order to play the files, you must have the library libmpg123-0 installed. If you installed Julius using one of the official releases, libmpg123-0 is already installed. When building from source, libmpg123-0 is usually installed with SDL\_mixer. If not, you can install it using your package manager. Where to place the MP3 files Create a folder named mp3 in the main folder where your Caesar 3 data files are. In this folder, place some or all of the following files: ROME1.mp3 - City background music, population 0 to 1000 ROME2.mp3 - City background music, population 1000 to 2000 ROME3.mp3 - City background music, population 2000 to 5000 ROME4.mp3 - City background music, population 5000 to 7000 ROME5.mp3 - City background music, population 7000+ Combat\_Long.mp3 - Battle music, 32 or more invaders on the map Combat\_Short.mp3 - Short battle music, 1-31 invaders on the map setup.mp3 - Main menu music For each file that is missing, Julius will play the original .wav instead.
