Epidemic!

<http://vetusware.com/download/Epidemic%21/?id=16271>

Epidemic! is a turn-based strategy game in which the player stands in control of a world on the brink of extinction. It was developed by Steven Faber for the Apple II and published by Strategic Simulations in 1982. In a 1983 review for Creative Computing, Brian J. Murphy wrote, "The game system is easy to master, and play is smooth," and "The documentation is entertainingly written and supports the program well, but even without the manual and player aid cards, a first time gamer stands a good chance of picking up the rules just by booting the disk and following the prompts."

Lucky Luke

<http://vetusware.com/download/Lucky%20Luke/?id=16272>

Based on the famous comics series about good cowboy Lucky Luke. In the game you as Lucky Luke have to arrest four Dalton brothers – Averell, William, Jack, and Joe. On your mission you will progress from level to level shooting bad cowboys, jail-breakers, and bad Indians with your revolver; collecting bullets, dynamites, sheriff stars, and other useful items; running, jumping, ducking, and climbing. The locations vary from Forts, Towns, and Jails to Mines, Train, and Saloon with Ghosts. On every level you have to complete different submissions to progress – either to free a Bank Director, or to collect Three Nuggets for Miner to obtain a Nitroglycerine, or to build a Totem for Apaches, etc. At the end of some levels you confront the big boss, it is often the one of Daltons.+++For Win9.x but Works with DOSBOX too+++
