Operation: Inner Space 1.29.08

[http://vetusware.com/download/Operation\\_%20Inner%20Space%201.29.08/?id=16322](http://vetusware.com/download/Operation_%20Inner%20Space%201.29.08/?id=16322)

Inner Space is the first Windows game with true AI. You fly around inside your computer, collecting icons or destroying them, and once all icons are dealt with, you are allowed to leave Inner Space. Imagine doing that at 36 frames per second, even on your 486? That's Inner Space.

Includes: This includes the full game and "The Works!" package which includes a ship builder and a sound and voice effects package. This game totally rules my childhood. The guy is still selling copies of this game, which was made at least 100 years ago. This version is prepackaged with DOSBox running a copy of Win 3.1 to make it run on Windows Vista/7/8 x64. Extract and run "innerspace.bat" News: Sound has been installed to work with DoSBox!
