Morespace v4.1 4.1

Morespace Version 4.1 Found on a floppy disk This version includes a CRC checking algorithm
that will make sure that the contents of all of your duplicate files are indeed the same. This is
much more powerful than simply searching by file size, name or date/time. More Space does
more than find duplicate files...it also scans for old files, large files, obsolete and large folders
allowing you to delete these files and folders very simply. It includes a unique 'SAFE HARBOR'
function that will keep you out of trouble by warning you before you delete special files. Functions
include duplicate search, file hog search, and date search. A quick clean feature allows you to
quickly identify files by extension for deletion such as '*.tmp, *.old, *.bak, etc. Includes plenty of 3D
disk statistics
