First, I'm also posting this in the WINDOWS category since this is a Software program for DOS and Windows.

I have the manual for Norton Speedrive 4.0, but no longer can find the disks. It was designed for DOS 6 and Windows 3.1.

I've searched far and wide, but the only seller I can find is in Poland -- even though it is an English version -- so I can't even figure out what the price is let alone the actual availability.

Does anyone have any suggestion as to where I might find a copy to download or purchase?
