This (IBM Storyteller) slide show shipped with Franklin PC-8000 XT clones in the mid 80's. It explains the features and capabilities of the Franklin PC-8000 in glorious CGA graphics. This copy was rescued from a rare original 5.25" 360k floppy. This ZIP file contains all files from the disk for ease of use with DOSBox, but the disk was originally bootable since the Franklin PC-8000 only came with two 360k 5.25" floppy drives.
