F-Prot 3.16f and virus definitions 20090204 (latest I could find 3.16f

[https://vetusware.com/download/F-Prot%203.16f%20and%20virus%20definitions%2020090204%20\\_latest%20I%20could%20find%203.16f/?id=16768](https://vetusware.com/download/F-Prot%203.16f%20and%20virus%20definitions%2020090204%20_latest%20I%20could%20find%203.16f/?id=16768)

F-Prot 3.16f (last available DOS version) with virus definitions updated to 20090204 (last definitions I could find). You'll need to run with the /old switch to force using outdated definitions, and if you don't have a floppy drive, use /nofloppy as well. H/T:
