Old program to speed the internet connection, can work on W95/98/NT4/ME/2000/XP etc. The original file was found to be infected with the Trojan Agent Virus that can be cleaned with Norton Antivirus. Don't worry it's not very dangerous, and it's not me who programmed that application it's an old company who's site is down since a long time. It can still work on some machines but not all of them, and it's a very rare file that can't be found anywhere else on the web! Tell me if you tried it! Francois.Lamarre@Distributel.net Frank
