Jesus Christ.

Honours to my real mom Huong Thi Vu
Honours to my real dad Nguyen Binh Thuy

Love to my real sister Nguyen Khoa Thuyen
Love to my real sister Nguyen Khoa Thi

Content:

Here in JCpoint is the 'final edition'. I do not know if I will keep adding to it more features! But you are able to make your own splash screen. You can use 3+ colors. The numbers 1, 3, 5, and 0 are the colors. Space will put a dot on the screen of the color you last picked. + saves the splash screen and - loads it. The under line key _ erases the screen.

Just enjoy#!!

Thank you Jesus Christ.

[I, J, K, and L moves the pencil point to draw your pictures.]

Jesus!
Chua Me O!
Jesus Christ!

I am no too good with my memories. I try to keep programming knowledge in my mind and have to look them up so far. My English is horrible. I am a visitor who is the lowest class in America. However, I try to be positive#!! Maybe God gives me a gift to take care of myself and my love ones sometimes when we need it the most!!!!!

I have been working hard on completing my two Borland Turbo C 2.0 books. I do not know the difference between 2.0 and 2.01 however I have 2.01 for the software itself. It has been a hard year studying and working on programming every single day. I almost went crazy yesterday because the stress is almost too much. And I am glad God gives me the talent to be The King of Programming for the remainder of my life!!!!!!!!!!!! I do not know if I should say that since it is pre mature. I should finish my other half of the programming book before I say something so bold.

I once heard a good advice (I guess). It says "Enjoy the journey along the way because the destination means it is over." Therefore, I hope to always keep studying even in my dying last breath? Many people do not realize how precious a programming job is or any job for that matter. People go to work every day complaining from time to time how bad it is to work. Yet they do not know how much they are appreciated.

My mother takes care of all the details so I can program full time and be a student full time except when I have to do house work. She does not know that I take her for granted. Today I know I have taken my mother for granted.

Anyways had to go call my mother. I am too old to be calling my mom like a kid! O well I guess I have to listen to the written word of God in The Holy Bible that says to love your own two parents so they do not feel like no one cares about them.

God, Jesus Christ, is number one.
Jesus Christ.

Here by Divine Inspiration of God is a reference screen.

It shows on the reference to use certain keys for drawing.

The 'g' key returns you to the game screen where you started.

There are so many features being defined that you have to look and study the page to know them all.

Well I know many of you hate my INTRO screen. So what I have decided to do is make you be able to put your own splash screen on. Remember to look at the reference screen and save often

your own drawings. To change the default DEMO screen to your own splash screen just rename from "savebmp.scr" to "default.scr" and there you have it! Every time the game loads up you have your own drawings on the top portion and the scores last saves on the bottom if any.

In this demo we illustrate that we can have our own splash screen.

When the game loads up you should see INRI and a cross instead of the standard credit screen.

Thank you Jesus Christ.

Thank you God for a new splash screen and an addition of the complete updated reference page so you can refer to the game commands by pressing the R key. Just press G at the reference page to return you to the game. Thank you!
