MegaStar Sky Atlas 5.0.15

<https://vetusware.com/download/MegaStar%20Sky%20Atlas%205.0.15/?id=17329>

The unforgettable and excellent deep-sky oriented program from E.L.B. Software (Emil Bonanno), first released in 1992. Used to be distributed by the now defunct Willmann-Bell. Includes latest fix and runs on most recent OSes without install (use C:\MegaStar5). Also under Linux (compat. layer Wine) | Basic download incl. Hipparcos & Tycho catalogues (no GSC catalogue or thumbnail images)
