GUIDE: Probably the most powerful and accurate astronomy planetarium programs ever created. ProjectPluto/Bill Gray - Already Installed and updated. 1) Extract zipped files to c:\guide9 ; 2) Edit (with any text editor) file "startup.mar" (in guide9 folder) - line 18 (location of DVD or extracted files from DVD). The files can be extracted to USB, SDCard, etc. (You will need GUIDE DVD - projectpluto.com) Runs flawlessly on modern systems, incl. Linux (under Wine compatibility layer)
