BIEW 6.1.0

<http://vetusware.com/download/BIEW%206.1.0/?id=12392>

Binary File viewer / Hex editor.

GEMA Assembler 2.6AA

<http://vetusware.com/download/GEMA%20Assembler%202.6AA/?id=12378>

GenPC aka GEMA is a symbolic assembler for MS-DOS. It is mainly based upon the 68k reference : GenST on Atari ST. Moreover the logical structure of Motorola 680x0 was adapted to Intel mnemonics, as it is actually easier and more logical. GEMA let you enjoy heavy coding and was especially designed for 32-bit processing. It now supports all the opcodes of Intel processors, from 8086 to P6, including all discovered, but undocumented opcodes!

Matheass (DE)

<http://vetusware.com/download/Matheass%20DE/?id=12379>

Mathematik Assistent & Lernprogramm Geschrieben in TrueBasic

PAX 2.0

<http://vetusware.com/download/PAX%202.0/?id=12391>

Portable Archive Interchange. Unix-like tar and cpio for MS-DOS and OS/2, incl. src.
