Adobe PhotoDeluxe Business Edition v1.0 1.0

CD \*.iso file located in the \*.zip file. Kindly read &quot;Readme\_IMP.txt&quot; for information on installing/potential problems you may encounter. Installed and tested on two virtual Win98SE systems: One in VMWare and another in VirtualBox, under the same Windows 10 Host Machine. Should probably work on real vintage hardware natively running Window 98.
