#### Creature Shock

<https://vetusware.com/download/Creature%20Shock/?id=17804>

Sci-fi first-person shooter game. Tested and run on DOSBox-X under Windows 10 Host. Important note: Does not run properly on Modern Hardware, without modifications: In DOSBox-X -- Run &quot;DOSBox-X Configuration Tool&quot;; -- Select &quot;CPU&quot;; and change cycles from &quot;auto&quot; to &quot;35000&quot;; -- Change back to &quot;auto&quot;; when done playing. Should probably not have problems on real vintage hardware. If problems are still encountered, kindly refer to online forums for tips/instructions.

#### day of the tenticle

<https://vetusware.com/download/day%20of%20the%20tenticle/?id=17807>

\*.zip file contains the game, &quot;Day of the Tentacle.&quot;; Often misspelled as &quot;day of the tenticle.&quot;; I've listed the name as such, so that it may be found even with the erroneous spelling. Simply extract contents in the \*.zip file and type &quot;TENTACLE.EXE&quot;; in the folder where files have been extracted to in DOS.

#### One Must Fall: 2097

[https://vetusware.com/download/One%20Must%20Fall\\_%202097/?id=17806](https://vetusware.com/download/One%20Must%20Fall_%202097/?id=17806)

Fighting video game involving robots controlled by humans. Installation instructions are in the &quot;Readme\_IMP.txt&quot;; file in the zip file.
