clipper 5.3 v5.3

<https://vetusware.com/download/clipper%205.3%20v5.3/?id=17852>

Successfully installed and run on a Windows 3.11 virtual system running on DosBox-X, under a Windows 10 Host system. Should probably also work on genuine vintage hardware running Windows 3.x natively. Installation present in the downloadable \*.zip file. Simply run "install.exe" in the virtual/real Windows 3.x system. Also included in the \*.zip file is a CD \*.iso image in the "CD\_ISO" folder, created from all files, if you want to mount/burn a CD version as required. Note: In Windows 3.x, once installed, the shortcut to launch the program is copied to the "Main" program group by default.
