SiSoft Sandra Pro 2001 Version: 7.10 Date: Novemeber 15, 2000 Platform: Windows 95/98/ME

SiSoft SANDRA 2001 - The Diagnostic Tool Professional Version

----- System analyser, diagnostic and benchmarking. SiSoft

Sandra is a Windows system analyser which includes benchmarking and testing modules. It works along the lines of Norton SI/32, Discover, CheckIt, etc. However it tries to go beyond them and show you more of what's really going on. You can get information about the CPU, chipset, video adapter, ports, printers, sound card, memory, network, Windows internals, etc. You can save/print/fax/e-mail system reports in text, HTML, XML, SMS/DMI or hierarchical format. Built-in report compression (Windows CAB). Multi-processor benchmarks for up to 32 CPUs. ***

COMMERCIAL VERSION - DO NOT DISTRIBUTE *** NOTE: This was a F.O.S.I.Scene

Release. He was known for only providing Full, Retail applications. Enjoy! AppleSeed 2023
