IDA Pro 7.0

<https://vetusware.com/download/IDA%20Pro%207.0/?id=17882>

IDA Pro v7.0 2017 Incl. All Hex-Rays Decompilers (LEAKED) [Ny2rogen] - Install using this password PassWord:qY2jts9hEJGy - Don't run IDA(Q) Pro yet! - Run the "PatchDrop.exe" which will drop the patcher file to "YOUR\_SYSTEM\_DISK\Program Files\IDA 7.0" (Your x64 Program Files) - Patch away! - That's it remember to firewall IDA(Q) or at least disable it from automatically updating itself, but I highly recommend you to block both IDAq.exe and IDAq64.exe using a third-party firewall software or with your Windows firewall cause sometimes disabling updates won't do the trick, tho the patcher will block Hex-Rays website in your hosts file. - Run the "RemoveTrace.exe" to remove the patch.exe from IDA installation directory so this won't cause any antivirus alarms (IT WON'T DELETE PATCHDROP.exe DON'T WORRY!) My antivirus didn't raise any alarm for running the patcher so if yours did then disable it for a while until you finish patching.
