PPJoy 0.83

<https://vetusware.com/download/PPJoy%200.83/?id=17942>

PPJoy is a joystick driver for Windows 98/Me/2000/XP (does not support Windows 95). PPJoy was designed for joysticks connected to the parallel port but also supports other devices via the virtual joystick interface and allows for joystick emulation using a mouse or keyboard. DirectX 9 required for full functionality. Version 0.83 was the last to support Windows 98/ME and development ended with version 0.84
