Magic CD DVD Burner 1.21

<https://vetusware.com/download/Magic%20CD%20DVD%20Burner%201.21/?id=18401>

This caught my eye because it is what Corel used to master "Corel Paint Shop Pro Photo X2 Ultimate". Full-featured ISO Builder and burner, geared towards developers. (You could order it with libraries for either VCL, ActiveX, .NET). Company is gone, wayback links don't have any recent binaries, found this one with the usual bit of sniffing around. No installer, supposed to be the FULL version. Also included "help.chm" from the newer trial edition, because this one shipped with the old style "MCDBurner.hlp". BTW, seems to run fine on Windows 10, x64. AppleSeed 2024
