FILES AND FOLDERS IN A SHOT BEFORE PLUG IT WORKS IN XP and Win7. The best software to catalog all your Windows Folder and all it's contents USING THE SAME YELLOW FOLDER ON WINDOWS. Useful for those who have many hard-disks or SSD, so we can search and see everything before plug them in usb. BUT NEED TO BE CRACKED, OR HAVE THE SERIAL. Unfortunately I don't have. The chinese owner has died long ago, but he did the best software I used for copy an entire HD. Even without crack I can see all my 30 disks, work for just 15 days to catalog the disks, if you need another one use a fresk windows on a separate HD to do the new task. BTW. if you have the serial let me know, epweste@hotmail.com
