PUFF (Pop-Up File Facility) 3.07

http://vetusware.com/download/PUFF%20_Pop-Up%20File%20Facility_%203.07/?id=12548

TSR Text viewer and file manager. "PUFF pops up from within any program, or while at the dos command line. It can perform actions like directory browsing, file copy, rename, and delete, can paste a filename or all or part of the contents of a file into the current application. It also has a built in text viewer that can view, and search files in ascii or hex mode. It has its own cut/paste buffer so that you can store a puff screen (e.g., a list of files) in the buffer and paste the screen into another application later." Amazing!
