The game is very simple in concept: Does anyone out there remember an old atari 2600 game
called 'quick step'? Probably not, at least I haven't met anyone other than my brother who does.
Spryjinx is the result of what started as an attempt to bring back what i consider a classic, then i
got 'creative' and made it my own by adding a lot of my ideas to it.   It also has some similarities to
'q-bert' which you may or may not remember. This game is just about as simple, but has all the
fun of head-to-head play.   Supports two-player and AI opponents.
