Hello!

I was wondering. I would like to run some Windows 3.11 games in a Virtual Machine, but I need a Windows 3.11 bootable image of Windows 3.11 first. :/ Does anyone have one of those images? I can't seem to find one anywhere. Thank you!

Hey Ultrax,

When I bought MS-DOS 6.22 my floppies were corrupt when it arrived in the mail however this website had a backup I could use. Check it out.
