QEMM GAME EDITION 7.5
http://vetusware.com/download/QEMM%20GAME%20EDITION%207.5/?id=12871
QEMM Game Edition is a special version of the full QEMM 7.5  package. It includes an updated version of the Quarterdeck DOS  Protected Mode Interface (QDPMI), specially designed to improve  Game Runner's support for DOS extended games.  QEMM's memory  management features are exactly the same in version 7.5 and Game  Edition.  QEMM in both versions fully supports DOS and Microsoft  Windows, and provides EMS, XMS, VCPI, and DPMI memory management.  The most significant difference between the two versions is that  QEMM 7.5 provides both DOS and Microsoft Windows user interfaces  for Manifest, QSETUP and INSTALL, while the Game Edition provides  the DOS interfaces only. QEMM 7.5 also provides the QuickBoot  feature, where the Game Edition does not.
