God, Jesus Christ, is number one!

Jesus Christ!

Bless GOD then my real mom Huong Thi Thuyen Vu

Honours to my real mom then my real dad Nguyen Binh Thuy

Congratulations to my real sister Thi Khoa Nguyen and Thuyen Khoa Nguyen for graduating.

Re: In this software I have written in DOS it has been implemented with a routine to help it work with 32-bit XP.

Thank you Jesus Christ.

God, Jesus Christ, is number one!

Bless GOD, Jesus Christ, Mary, The Holy Spirit, then my real mom Huong Thi Thuyen Vu

Honours to my real mom then my real dad Nguyen Binh Thuy

My real mom always tells me to be nice.

My real dad always tells me to study and be practical.

My real mom is like the tortoise who succeeds later in life.

Congratulations to my real two sisters Nguyen Khoa Thi and Nguyen Khoa Thuyen

Content: Thank you Jesus Christ.

Through my parents' support especially my mom I am able to produce an arcade game of sorts in the making for 32bit Microsoft Windows XP.

I did have a little help from the public and private sector when I was a rebel, but most of the help comes from my real two parents#

Bless GOD!

In the beginning GOD created Adam and Eve to be our original parents.

Eventually, people spread out all over the world and mutated.

I come from a group of people called Vietnamese.

My real dad is Nguyen Binh Thuy.

My real mom is Huong Thi Vu.

My real parents eventually have two additional kids besides me:

Nguyen Khoa Thi

Nguyen Khoa Thuyen

In time I found someone I want to be my wife:

Ho Thi Nga

I plan to name my daughter Nguyen Khoa Tuyet

Content: Thank you Jesus Christ.

The point I am trying to make is through GOD giving me two perfect parents I have been able to process quite a bit of programming knowledge. If you have 32bit versions of Microsoft Windows XP this game should work nicely for you. I did put it up for sale at \$5 USD. It is not much however you should be able to score at least a billion points.

This version has been specially calibrated for 32bit versions of Microsoft Windows XP. No waiting necessary. Just double click on GAME.EXE and keep the cap lock on. There is a reminder on the screen the 5 keys you must use to navigate.

Once again all the credits are on the screen.

Enjoy!

Well many of you should know by now what I believe! Jesus Christ! Bless GOD, Jesus Christ, Mary, and The Holy Spirit!!! Then bless my real mom Huong Thi Thuyen Vu. Of course, Honours to my real dad Nguyen Binh Thuy and my real mom too. Obviously congratulations to my two real sisters Nguyen Khoa Thi and Nguyen Khoa Thuyen. Hello to Borland...

There was a glitch in the previous release for my version of this demo. I failed to initialize the spaceship so it got stuck at the top. So this one has the latest fix.

Please remember all entries must be capitalized. With the speed of XP and the power of assembly language I hope to make a cool game. I wasn't able to do so before however now I'm on XP I could do that.

The only problem is that I'm doing everything in assembly language so it's going to take quite some time to complete my game for XP.

Don't get your hopes up hehe

I'm just a newbie at XP so you'll have to forgive my innocent presence# haha

Well I guess it's time to give you the latest updated fix.

GOD bless me and my real family!!!!

Here is the same game from the DOS section for 32+bit XP. The control keys are:

J left

L right

I up

K down

spacebar releases The Holy Cross

Q quit

(all keys are capitalized)

The speed should be slightly faster than DOS.

When The Holy Cross is released the object is to capture it again.
You do that by touching The Holy Cross.

Just a simple game.

I, Nguyen Khoa Tien, have been working 2 years straight to finally produce something that would be an INTRO that I could call my own. Today I believe I have done that. It is nothing big. However I know my parents (Nguyen Binh Thuy & Huong Thi Thuyen Vu) started from the ground up. So did my two sisters. They had to graduate from Universities before they could be officially recognized for important work. So it is my turn to start from the ground up. I am just tidying a few things up so that the Windows interface disappears up exit.

This software should work for Windows 10 since it is a 32bit front end to DOSBox 0.74 so it could support natively 16bit work that I am doing. It has been tested in 32bit Windows Vista so far by me. Other Windows should work too depending...

This is one of my official beginning works after four years of hard studying and working. I had fun for the first two official years in community college, but the later two years has been very hard on me. The later two years have all been work on an independent basis at home.

All of my programs are 16bit softwares running back on MS-DOS era however it has not successfully passed real hardware test since I don't have real hardware to use.

So I have imitation of real hardware through DOSBox 0.74

[View Forum Message](#) <> [Reply to Message](#)

Well I've been working hard for another genuine production. I've used what is called IcoFX 2.3 or something rather to produce this INTRO icon from one of my stock images kinda. Well the images was edited a long time ago however it has become standard. All in all I combined WinRAR 3.93 (32bit) with IcoFX 2.3 (32bit) to produce this. I think IcoFX 2.3 is 32bit. However you have 30days to get a license otherwise you won't be able to save your icons.

Jesus Christ!

If you notice I have a JESUS icon to my self-extraction program made by WinRAR. The picture of my family was edited using PhotoShop CS2.

I'm the lowest status that you can't get any lower from start to finish, but I continue to love GOD for eternity! Thank you Jesus Christ 0 A.D. This is the packed program using DOSBox 0.74 to trick Windows into running a 16bit MS-DOS program. It took me many years to perfect the process however my hard work is someone else's laughter. It unpacks itself and the destination folder contains the entire source code. You might be able to find the compiler for sale on eBay. However the last I saw it was like 2 years ago. Now a days you'll have to purchase the entire builder. It used to be that you could purchase it separately.

Although I'm the lowest status ever past present and future GOD 0 A.D. is the decision maker of my destiny. hehe

Thank you to my real mom Huong Thi Thuyen Vu for going to church and taking me there during grandma's passing.

Thank you to my real dad Nguyen Binh Thuy for sending me to one of the top ranking engineering Colleges: Lafayette.

Congratulations to my real two sisters for graduating from University of Houston and University of Millersville.

One for chemical engineering and one for computer science.

Subject: VirtualBox 5.1.6 successfully runs 32bit XP
Posted by [tienkhoanguyen](#) on Sat, 17 Sep 2016 22:59:36 GMT
[View Forum Message](#) <> [Reply to Message](#)

Well the old VirtualBox wasn't able to run 32bit XP nor any of my other OS for some reason. So I upgraded to the latest to date 5.1.6 and it successfully runs both my 32bitXP and Win2Kpro thank you 0 A.D.! These days with resources at a premium you can't waste much. Thankfully 0 A.D. we manage to get by comfortably. So if you ever wanted to run 32bitXP so you can try these softwares you can always use VirtualBox that is free at the moment. Please make sure you get the 32bit XP instead of the 64bit XP unless you just want to run 64bit softwares. Or if you have 32bit softwares or 16bit softwares you can stay with 32bit XP.

Here is an update that *should* work from Windows XP on up to Windows 8. I'm not sure if it would work on Windows 10 because I don't have Windows 10. It is the same INTRO except it runs on DOSBox 0.74 so when you exit it does not mess up the display.

If you have problems you have the option to download DOSBox 0.74 for your system and download my softwares from here. Then it should work.

[View Forum Message](#) <> [Reply to Message](#)

Here is DOSBox 0.74 for Windows. If you have other systems you could go to there website and download the one for you. This allows you to run all my softwares in the DOS section on your Windows XP and other Windows.

Here is the same sounding board for DOS that has been made to work on XP through DOSBox 0.74. To exit just press ESC or just type away when you see the blank screen.

This update is both the source code and the executable. Each file has its own purpose. The source code gives the logic of how all the routines are accomplished. The executable can be run directly in Windows XP without the need of going through all the hassles of compiling it first. This source code has been modified subtly to make it work directly in Windows XP. However upon exit it has been shown to mess up my display on my end when I use VirtualBox. So making it a self extracting file might end up being the best route if the workaround method works.

Once again ESC exits the first screen of the INTRO while Q goes to the next screen for the following pages.

Thank you Jesus Christ.

This one is a patch so it would work on XP and other Windows. JESUS# No guarantees, but it has been tested briefly on 32bit XP.

The main update to the DEMO is the unravelling of the characters one dot at a time. If you make a long message you should be able to have enough time to see the movements.

Well this INTRO has come a long ways. I've continued on the game section of the INTRO. When you reach the screen with the clouds you can move the clouds around with the keys a d s w. You release the INRI towards the exit. If it is lined up right Jesus Christ comes out of the clouds. If you missed then Jesus Christ remains hidden. Spacebar releases the INRI while q quits. Have fun I hope?

Maybe there will be scoring later. For now it is in development. Space is running out since DOS only allows 64k and I've used 35k or such so far.

Once again I'm happy thanks to GOD since this is my first major assembly language production that is planned to fill up all or most of DOS's main memory.

For manual compiling for programmers and developers please use Borland Turbo Assembler 4.1; Otherwise for those who just wish to see the INTRO without knowing how it works please just run the executable. Thank you!

This one has one standard for 32-bit XP. The other one has been verified on Windows 8 build 9200. It is possible it could even run on Windows 10.

Please give all proceedings to the church (any church of Jesus Christ will do) if there should be

any doubts from outsiders to whom this software belongs!

Otherwise the main portion that can be verified goes to my real immediate family:

1/4: mom Huong Thi Vu

2/4: dad Nguyen Binh Thuy

3/4: sis Nguyen Khoa Thuyen

4/4: sis Nguyen Khoa Thi

I Nguyen Khoa Tien would be the last however I am speaking just in case of my untimely death.

Jesus Christ! Bless GOD, Jesus Christ, Mary, The Holy Spirit# Then bless my real mom Vu Thi Thuyen Huong. Honours to my real mom and my real dad Nguyen Binh Thuy. Congratulations to my real two sisters Nguyen Khoa Thuyen and Nguyen Khoa Thi.

Content: Thank you Jesus Christ.

In this package it automatically unpacks itself and runs if the system allows. This software contains two games that many of you know. One is unshuffle the board and the other is line up the INRI. I take great care to make it well since it has my country of birth flag. I did include two vintage pictures in the package of my family. Thank you.

I, Nguyen Khoa Tien, have been hard at work. 43 years of my life I have waited to roll out something I could be proud of. Even now GOD continues to take all the credits for all my work and I am happy with that! All the INTROs you've seen to date are credited to GOD by me. I don't have much however by grace GOD gives me what I need. It's not what I want and that is alright by me. When GOD says it must be so I don't argue# Past, present, and future may GOD always rejoice gleamings!!!!!!!!!!!!

Well this is a Christmas themed intro for 32-bit XP only. Actually if it can run in DOS mode it would work. For instance Win2K should be able to run it. It is a little different than DOSBox 0.74 in the sense that the processor is a lot faster.

[View Forum Message](#) <> [Reply to Message](#)

Here is the complete package I think. hehe Well this is me trying to pack 43 years of work into less than 2MB of space for 32b Windows XP. What is interesting about this is it is all in DOS. The graphics utilizes 256 colors so it looks pretty lifelike even for DOS that usually handles a mere 16 colors.

Well this is an old sprite! hehe Everything is normal until the puzzle section. If you want to play the puzzle game just press the spacebar and try to unmix it# hehe If you just want to make it easy at first you could just mix it yourself. It is at the screen where GOD's son and GOD's mother is displayed.

[View Forum Message](#) <> [Reply to Message](#)

(tweaked) I've just been tweaking a few codes so it is cleaner when it is playing. You should not be seeing anymore technical informations displayed about the image. Now it should load immediately unless the image is not found. In that case the text might be a little messed up. So to be sure just keep the zipped file all together even during distribution.

Jesus Christ! Bless GOD, Jesus Christ, Mary, and The Holy Spirit. Bless my real mom Vu Thi Thuyen Huong. Honours to her and my real dad Nguyen Binh Thuy. Hellos to my two real sisters Nguyen Khoa Thuyen and Nguyen Khoa Thi.

Content: Thank you 0 A.D.

In this software we are experimenting with levels. We might have the abilities now to have levels for games. The difference is that we are able to have enough levels to fill a diskette capacity. Normally we are confined because of the memory limitations. However this working prototype is just the beginning. Now all we need is to add additional softwares.

I have to think hard to see what else I happen to be grace to make. So don't hold your breathing! It took years to refine my typing hehe So it takes years to develop. Look at my real mom. She took years to get to 63 years old!!! hehe

Content: Special Anniversary Edition between Microsoft and Apple!!!

This is a special anniversary edition between Microsoft and Apple software. To the eye nothing looks different. However it is up to you to find that something. It is not much however I hope those who find it enjoy.

If needed I'll give you the spoiler or your friends who happen to find it can spread it. hehe

I think it is cool however...
