Framework III
http://vetusware.com/download/Framework%20III/?id=13063
Originally created by Forefront Corporation for Ashton-Tate and first released in 1984, Framework
was an early integrated office suite for DOS. It has a built in word processor, spreadsheet,
database, outliner, graphing, and telecommunications.   Framework provides a text-based "gui",
including windowing and menus. All of the different components behave in similar, consistent
ways. Archive includes ten 360K 5.25" floppy disk images.

Ontrack Disk Manager 11.2 11.2
